Solvent Green 5

Fluorescent Yellow 8g CI solvent green 5 is ellow oil soluble dye with strong green fluorescence with features of excellent heat resistance and light resistance and high coloring power. Solvent green 5 can be used for coloring gasoline, PVC, ABS plastics and plexiglass, and also for nondestructive testing of metals.

Solvent Green 5 Specification

» Product name: Solvent Green 5

» Type: Solvent dyes

» CAS NO.: 79869-59-3

» Light fastness: Grade 7

» **Heat resistance:** 300 ?

» **Migration resistance:** Grade 7

» **Shade**: fluorescent yellow

Solvent Green 5 Basic Information

Basic Information	
Product Name	Fluorescent Yellow 8G
Colour Index	C.I. solvent Green 5
CAS No.	79869-59-3
Specification	
Shade	Similar With Standard
Appearance	Yellow powder
Moisture %?	0.10
Heat Resistance	300?
Properties	Insoluble in water, soluble in organic solvent

Specific Application

» Color paste application: paper color paste, building color paste, etc;
» Plastics (pvcpepspabseva), rubber leather, etc.
» Coating industry: alkyd paint, amino paint, automotive paint, waterborne paint, powder coating, etc.;
» Ink Industry

Cangzhou Xincheng Weiye Chemical is focus on producing solvent red dyes, solvent blue dyes, solvent green dyes, welcome your inquiry.
