The water solution of acid rhodamine B is red color with blue shade and yellow fluorescence and blue-light-red color in sodium hydroxide solution. It is soluble in alcohol. It is orange in concentrated sulfuric acid and red in dilution.

Acid Rhodamine B Specification

- » **Product name:** Acid rhodamine B Extra
- » **Type:** Acid Dyes
- » **C.I. NO.:** 45100
- » **CAS NO.:** 3520-42-1

» **MF:** C27H29N2NaO7S2

Acid Rhodamine B Physical Properties

Basic Information	
Product Name	Acid Rhodamine B
Colour Index	C.I. acid red 52
Colour Index No.	45100
CAS No.	3520-42-1
Specification	
Shade	Similar With Standard
Strength	400%
Appearance	Red Powder .
Moisture %?	2.0
Insoluble Matter %?	0.3
Properties	Very soluble in water and alcohol

About Packing

Our acid [rhodamine](#) B will be packed in 25kg per iron drum, firber drum or carton box.

If you have other special packing request, we can also meet your demand.

About Sample

» After giving offer, we can arrange the corresponding sample for your testing.

» If you have sample in hand, we suggest you send us your sample for our lab person test, then we will provide copy sample for your test.

This is the most efficient way to confirm the product and its strength.

Yeah ! Add Some Color To Your Life ! XCWY Dyes Welcome your contact !
