Moisture %?	1.2
Insoluble Matter %?	0.15
Properties	It is very soluble in water and alcohol

Basic victoria BO application

When dyeing silk, if dyed with direct light-resistant turquoise blue GB or direct lake blue 5B, then dyed with basic victoria BO, the resulting brilliant color is beyond that any other dyes.

This product is mostly used for coloring paper, bamboo and wood products, as well as for making blue ink, biological and bacterial tissue coloring.

Used in the manufacture of ballpoint pen oil, carbon paper and waxed paper. It can also be used to dye bamboo and wood and to make color lakes. It can also be used for dyeing cotton, acrylic and silk.
