Focusing on chemical Direct Chrysophenine GX for over 20 years, welcome to contact with XCWY for Direct Chrysophenine GX price and more suggestions.

Direct Chrysophenine GX Specification

» Product name: Direct Chrysophenine GX

» Type: Direct dyes

» C.I. NO.: 24895

» CAS NO.: 2870-32-8

» Other names: Direct yellow g, direct yellow gx

Direct Chrysophenine GX Crystal Information

Basic Information	
Product Name	Direct Chrysophenine GX
Colour Index	C.I. Direct yellow 12
Colour Index No.	24895
CAS No.	2870-32-8
Specification	
Shade	Similar With Standard
Strength	100%
Appearance	Dark yellow powder
Moisture %?	2
Insoluble Matter %?	0.5
Properties	Very soluble in water and alcohol

Direct Chrysophenine GX Advantages & Application

Direct yellow G is yellow powder. It has the characteristics of high light fastness, bright color, strong dyeing power, good transparency, fast coloring and good dyeing.

It is mainly used for dyeing cellulose fabrics such as cotton, linen, viscose, artificial cotton, rayon, silk, nylon and their blended fabrics.

It can also be used for dyeing leather, paper pulp, biology and making color lake.

XCWY Chemical company--largest manufacturer of basic rhodamine, is ready to serve you.
