CAS No.	587-98-4
Specification	
Shade	Similar With Standard
Strength	100%
Appearance	Yellow Powder .
Moisture %?	1.5
Insoluble Matter %?	0.5
Properties	Very soluble in water and alcohol

Attentions in the Use of Acid Golden Yellow G:

-
1. The production process and equipment of chemical raw materials of metanil yellow G can be improved, especially the ball mill and charge workshop of explosive factory should reduce dust concentration vigorously, strengthen ventilation and detoxification measures, improve working conditions and working environment and avoid or reduce contact as far as possible.
 2. Strict operating rules, establish and improve various safety production systems.
 3. Strengthen personal protection and hygiene. After the work is finished, warm water should be showered and 10% potassium sulfite soap can be used to wash to remove pollution.
 4. Strengthen health care, employment check-up and regular check-up every year. Work type rotation system can be implemented according to the situation to work with Rhodamine.
