Direct Red 23

Direct Red 23 belongs to direct dyestuff, also can be called direct red 4BS, direct scarlet lightfast, enianil fast scarlet 4BS.

It can dissolve directly in water and has high directness to cellulose fibers without using chemical methods to colour fibers and other materials.

Direct Red 23 can color protein fibers (such as wool and silk) in weak acidic or neutral solution. Direct Red 23 is also used for dyeing cotton, linen, rayon.

Direct Red 23 Specification

» Direct Dyes **Name:** Direct Scarlet 4BS

» Colour Index: C.I.Direct red 23(29160)

» CAS No.: 3441-14-3

» EINECS: 222-348-4

» Usage: Cotton Dyestuffs, LinenDyestuffs, Paper Dyestuffs, Silk Dyestuffs

Direct Red 23 Basic Information

Basic Information	
Product Name	Direct Scarlet 4BS
Colour Index	C.I. Direct Red 23
Colour Index No.	29160
CAS No.	3441-14-3
Specification	
Shade	Similar With Standard
Strength	100%
Appearance	Red Powder
Moisture %?	1.5
Insoluble Matter %?	0.5
Properties	Very soluble in water and alcohol

Main Uses & Characters of Direct Scarlet 4BS

It can be used for dyeing cellulose fibers such as viscose, silk, wool, paper and pulp, as well as for making organic dyes.

It is bright red to magenta in concentrated sulphuric acid and turns orange with brownish after dilution; it has orange precipitation in concentrated nitric acid; it is insoluble in concentrated caustic soda solution; it is bright red in concentrated ammonia water.

XCWY is very Good at the Following Dyes

» Direct red dyes

» Rhodamine red dyes

» Solvent red dyes
