High Temperature Effects on Pink Mosquito Coil Dye

1. Most dyes will have physiological changes under the action of high temperature, leading to the fading of the dyed products, which will affect the normal use of the products. Pink color mosquito dye is a special dye, which will not fade under high temperature. The products dyed with this dye has a long service life, but we suggests not exposed to the sun for a long time.

2. The pink color mosquito coil dye has a certain fastness, we add certain substances in the producing process. It will not have sublimation phenomenon at high temperature, thus the fading phenomenon will not occur.
