Properties	Very soluble in water and alcohol

### Direct Black EX Properties

The appearance is brown black powder. After soluble in water, it's black with greenish tint. After soluble in ethanol, it is blue black, soluble in fibrinolysin, insoluble in other organic solvents. When concentrated sulphuric acid, it is dark red with blueish shade. It produces purple to black precipitation with reddish shade after dilution; when concentrated nitric acid, it is brown solution with yellowish shade; when concentrated hydrochloric acid, it is black color with dark reddish shade. When concentrated hydrochloric acid, it is used to precipitate the dye solution in purple color.

As the largest manufacturer of rhodamine b in China, we can provide you superior quality dyes with factory prices.
