Ballpoint Pen Ink Dye

The main ingredients in the formulation of ballpoint pen ink include dyes, film-forming agents, solvents, dispersants and other additives.

The basic ingredients of the formulation:

» Ballpoint pen ink dye: 5%-25% dye
» Film-forming agent: 5%-15%
» Solvent: 30%-60%
» Dispersant: 5%-20%
» Other additives: 2%-10%.

The function of dyes is to give ink sufficient color depth.

Xincheng Weiye Chemical is specialized in manufacturing various kinds of ballpoint pen ink dye including basic dyes, acid dyes and solvent dyes.
