Sulphur Blue CV

Sulphur blue CV is blue grey powder. Slightly soluble in water. It is olive color dissolved in sodium sulfide solution.

It is dark blue in concentrated sulfuric acid and produces dark blue precipitate after dilution. It was dark yellow in basic sodium hydroxide solution and returned to normal color after oxidation.

Sulphur blue CV is mainly used for dyeing and direct printing of cotton, hemp and viscose fibers.

Sulphur Blue CV Information

Basic Information	
Product Name	Sulphur blue CV
Colour Index	C.I. sulphur blue 15
CAS No.	1327-69-1
Specification	

Shade	Similar With Standard
Strength	100%,120%
Appearance	Blue grey uniform powder
Properties	Insoluble in water
