Pink Masterbatch Dyes

Color masterbatch is a kind of high concentration colored granular material which is made of colorant, carrier resin, dispersant, coupling agent, surfactant and plasticizer;

Using color masterbatch to produce plastic products, the colorant in the product has good dispersion, bright color, colorless spots or color difference on the surface of the product, convenient to change color, low cost and friendly to the environment. It is a widely used and promising plastic coloring method.

Our factory is focusing on producing different color masterbatch dyes/colorants. The colors including pink, red, blue, yellow, green, orange and black.

Our pink masterbatch dyes **advantages:**

» Good Purity
