Solvent Yellow 82 Specification

» Product name: Solvent Yellow 82

» Type: Solvent dyes

» CAS NO.: 12227-67-7

» Molecular Weight: 344.3

» Molecular Formula: C17H13N4NAO3

» **Packing:** 25kg net weight in fiber drum

» **Shade:** Bluish yellow powder

Solvent Yellow 82 Basic Information

Basic Information	
Product Name	Solvent Yellow 82
Colour Index	C.I. solvent yellow 82
CAS No.	12227-67-7
Specification	
Shade	Similar With Standard
Appearance	Yellow powder
Density	1.26g/cm^3
Heat Resistance	190?
Properties	Insoluble in water, soluble in organic solvent

Having 26 years experience in the field of solvent dyestuff, our main products are solvent red dyes, solvent blue dyes, solvent green dyes, solvent black dyes with reliable quality and competitive prices. Welcome your inquiry.
