Direct Black 168 Liquid

Direct black 168 liquid CAS 85631-88-5 produced by Cangzhou Xincheng Weiye Chemical factory is a kind of direct black liquid dye.

Direct dyes are widely used in dyeing and printing of paper, cotton, viscose, silk and hemp. They are also widely used in the dyeing and printing of polyester / viscose, polyester / cotton, wool / viscose, brocade / viscose blends.They are widely used in the dyeing of paper, leather, leather, wood, writing ink and inkjet printing ink. Some direct dyes can be further processed into lake pigments, which are used as organic pigments in paints, inks, plastics, rubber and so on. Therefore, the development of direct dyes plays an important role in the whole dye industry.
