Solvent Yellow 16

Solvent Yellow 16 is a coloring agent in cosmetics, which can be used for coloring resin, transparent paint, aluminum foil, etc.

Solvent yellow 16 chemical properties: yellow powder, melting point 155°C. It's insoluble in water, soluble in organic solvents such as ethanol, acetone, Chemicalbook chloroform, etc.

It is greenish yellow in concentrated sulfuric acid, and turns to orange-yellow after dilution.

Solvent Yellow 16 Specification

» Product name: Solvent yellow 16

» Type: Solvent yellow dyes

» CAS NO.: 4314-14-1

» **Appearance:** Uniform yellow powder

» **MF:** C16H14N4O

» **Molecular Weight:** 278.31

» **Properties:** Insoluble in water, soluble in organic solvent

Our other solvent dyes

» Solvent red dyes: Red 8/23/24/25/49/135/218

» Solvent blue dyes: Blue 35/36/70

» Solvent green dyes: Green 3/5
