Rhodamine B Liquid

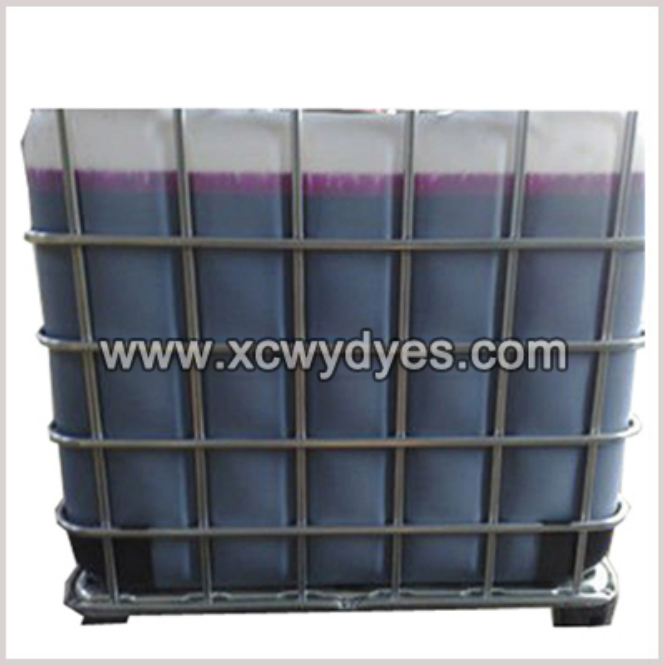

Rhodamine b liquid is easy to dissolve in water, and its aqueous solution is pink red with yellow green fluorescence, which is a kind of high grade basic dyes.

Rhodamine b liquid can form lakes with high light fastness, bright color, strong coloring power and good transparency.

Therefore, liquid rhodamine b is widely used in the coloring of paper and cosmetics, as well as in wood, mosquito coil, incense and egg trays.

Liquid rhodamine red dyeing egg tray/mosquito coil
