Sulphur Black For Textile

As the main black color for cottong dyeinng, sulphur black for textile is insoluble in water and alcohol, but it can be soluble in sodium sulfide solution with color shade of blueish and reddish.

Producing sulphur black for textile for more than 26 years, our factory can manufacture crystal and liquid in various quality levels.

They are widely used for denim fabric and cotton coloring with good fastness and bright color shade.

Sulphur black **dyes usage**

It is mainly used for dyeing cotton textiles, but also for dyeing hemp, vinyl, viscose and cotton blended fabrics.

Storage and transportation

Should be stored in a dry and ventilated place, avoid direct sunlight, prevent moisture and heat. Handle with care during transportation and do not damage the packaging.
