# Pigment Yellow 14

Pigment Yellow 14 CAS 5468-75-7 is a yellow powder with bright color, strong coloring power, good transparency and good application performance. Pigment yellow 14 is one of the important varieties of benzidine organic pigments. It has a slightly green shade compared to pigment yellow 12, and leans towards green shade compared to European color standards; light fastness 1-2 levels; Good solvent resistance and paraffin resistance, especially in the United States, widely used for packaging and printing ink.

## Pigment Yellow 14 Specification

* CAS No.: 5468-75-7

* Molecular weight: 657.55

* Molecular formula: C34H30Cl2N6O4

* PH value: 6.0-7.0

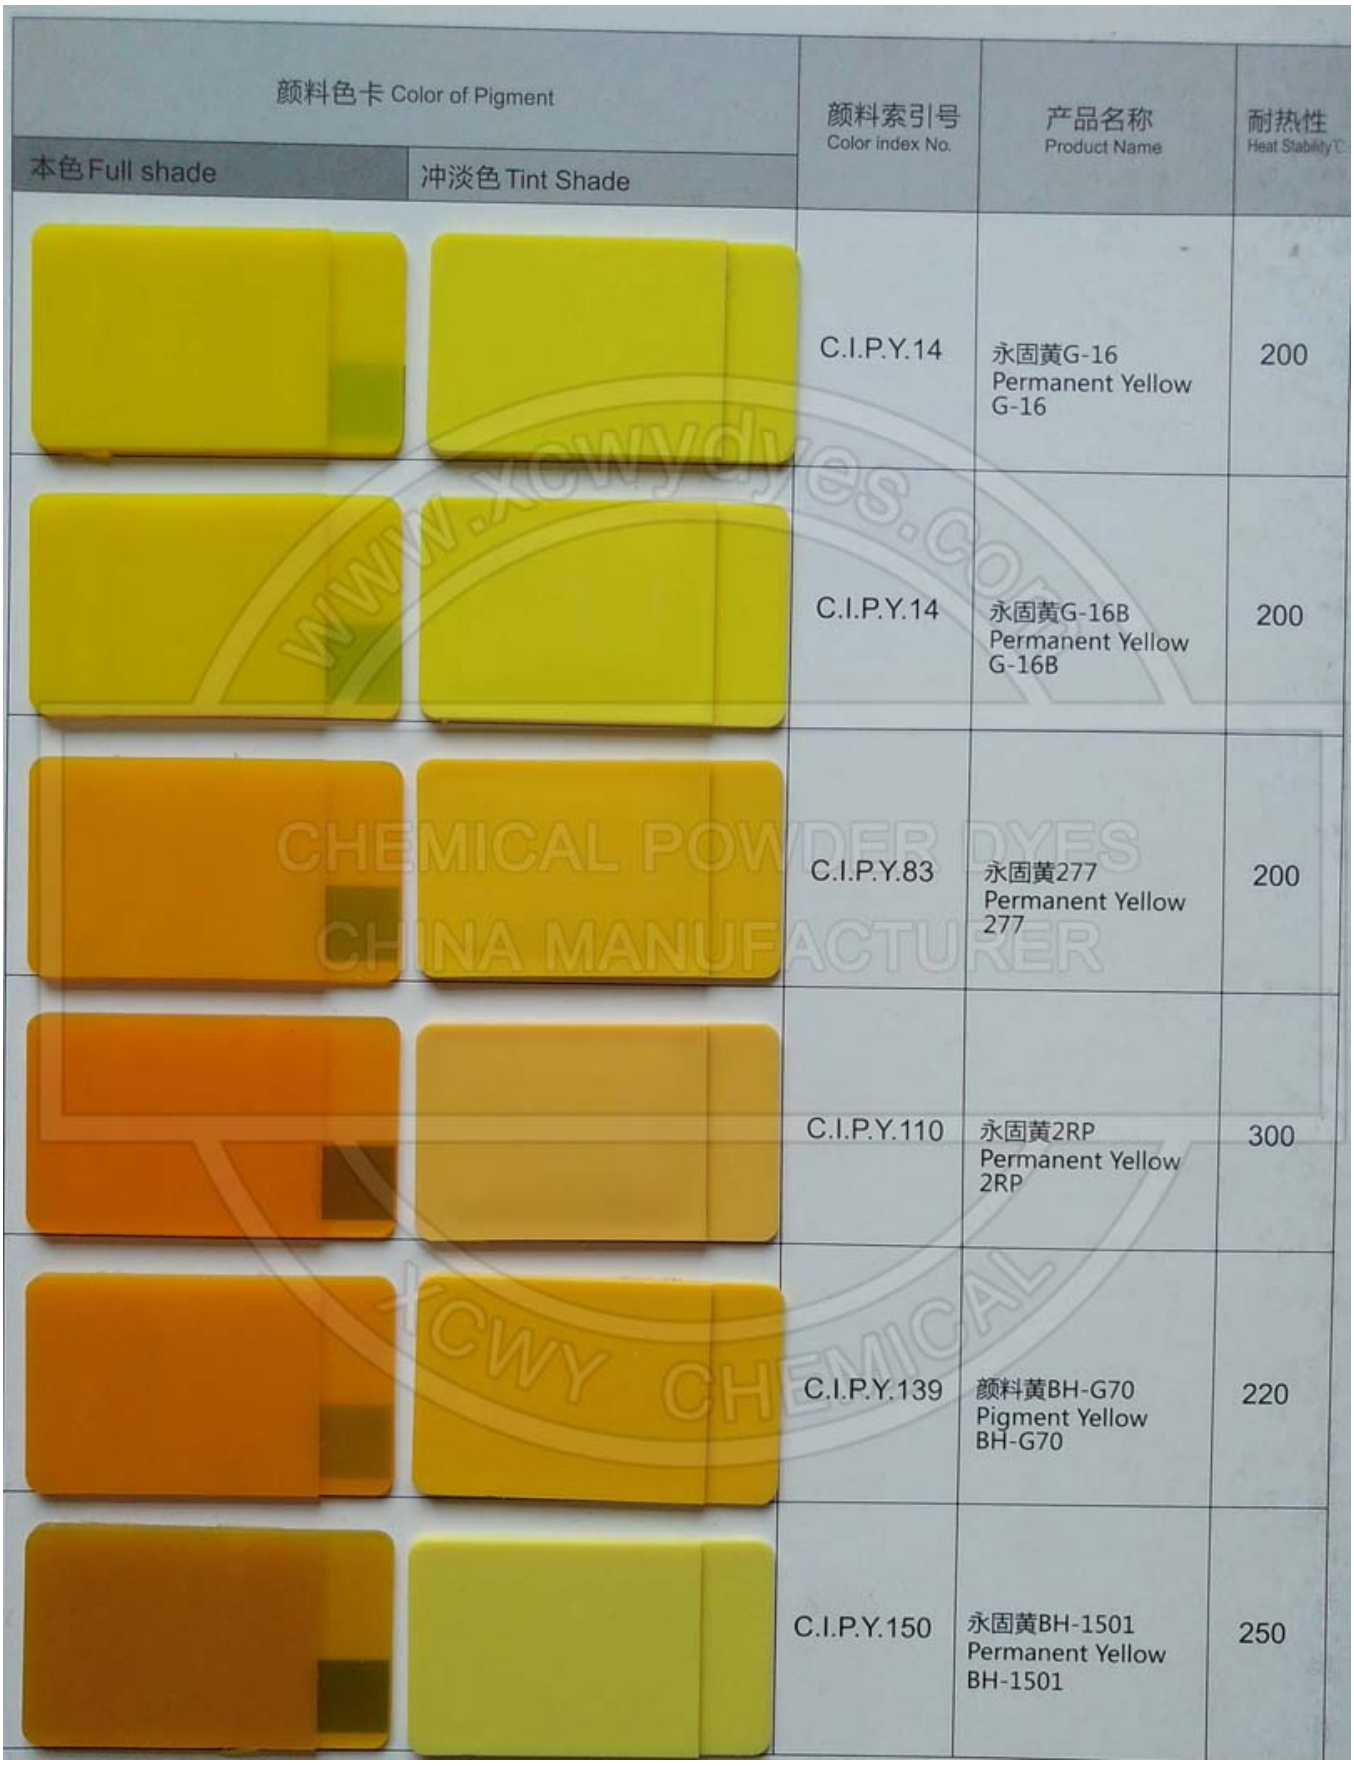

* EINECS No.: 226-789-3

* Density: 1.4203 (rough estimate)

## Pigment Yellow 14 Application

Pigment Yellow 14 is mainly used for coloring rubber, plastic, and rubber products, as well as for coloring polyurethane synthetic leather, high-end ink and coatings, and printing paste.
