Pigment Red 170

Pigment red 170 CAS 2786-76-7 is a red powder with bright color, strong coloring power, good transparency and good fastness and chemical stability. Pigment red 170 is mainly used for Coloring of ink, paint, plastic, rubber.

XCWY

Pigment Red 170 Specification

Product name: Yonggu Red 170, Yonggu Red F3RK

International Index Number: C.I.Pigment Red170

CAS registration number: 2786-76-7

Product Series: Monoazo Pigments

Physicochemical and fastness performance

Molecular weight: 454.48

Molecular formula: C26H22N404

PH value: 6.5-7.5

Specific gravity: 1.5

Oil absorption capacity (ml/100g): 35-45

Light resistance: Level 7

Weather resistance: 4-5 levels

Heat resistance: 240 ?

Water resistance: Level 5

Oil resistance: Level 5

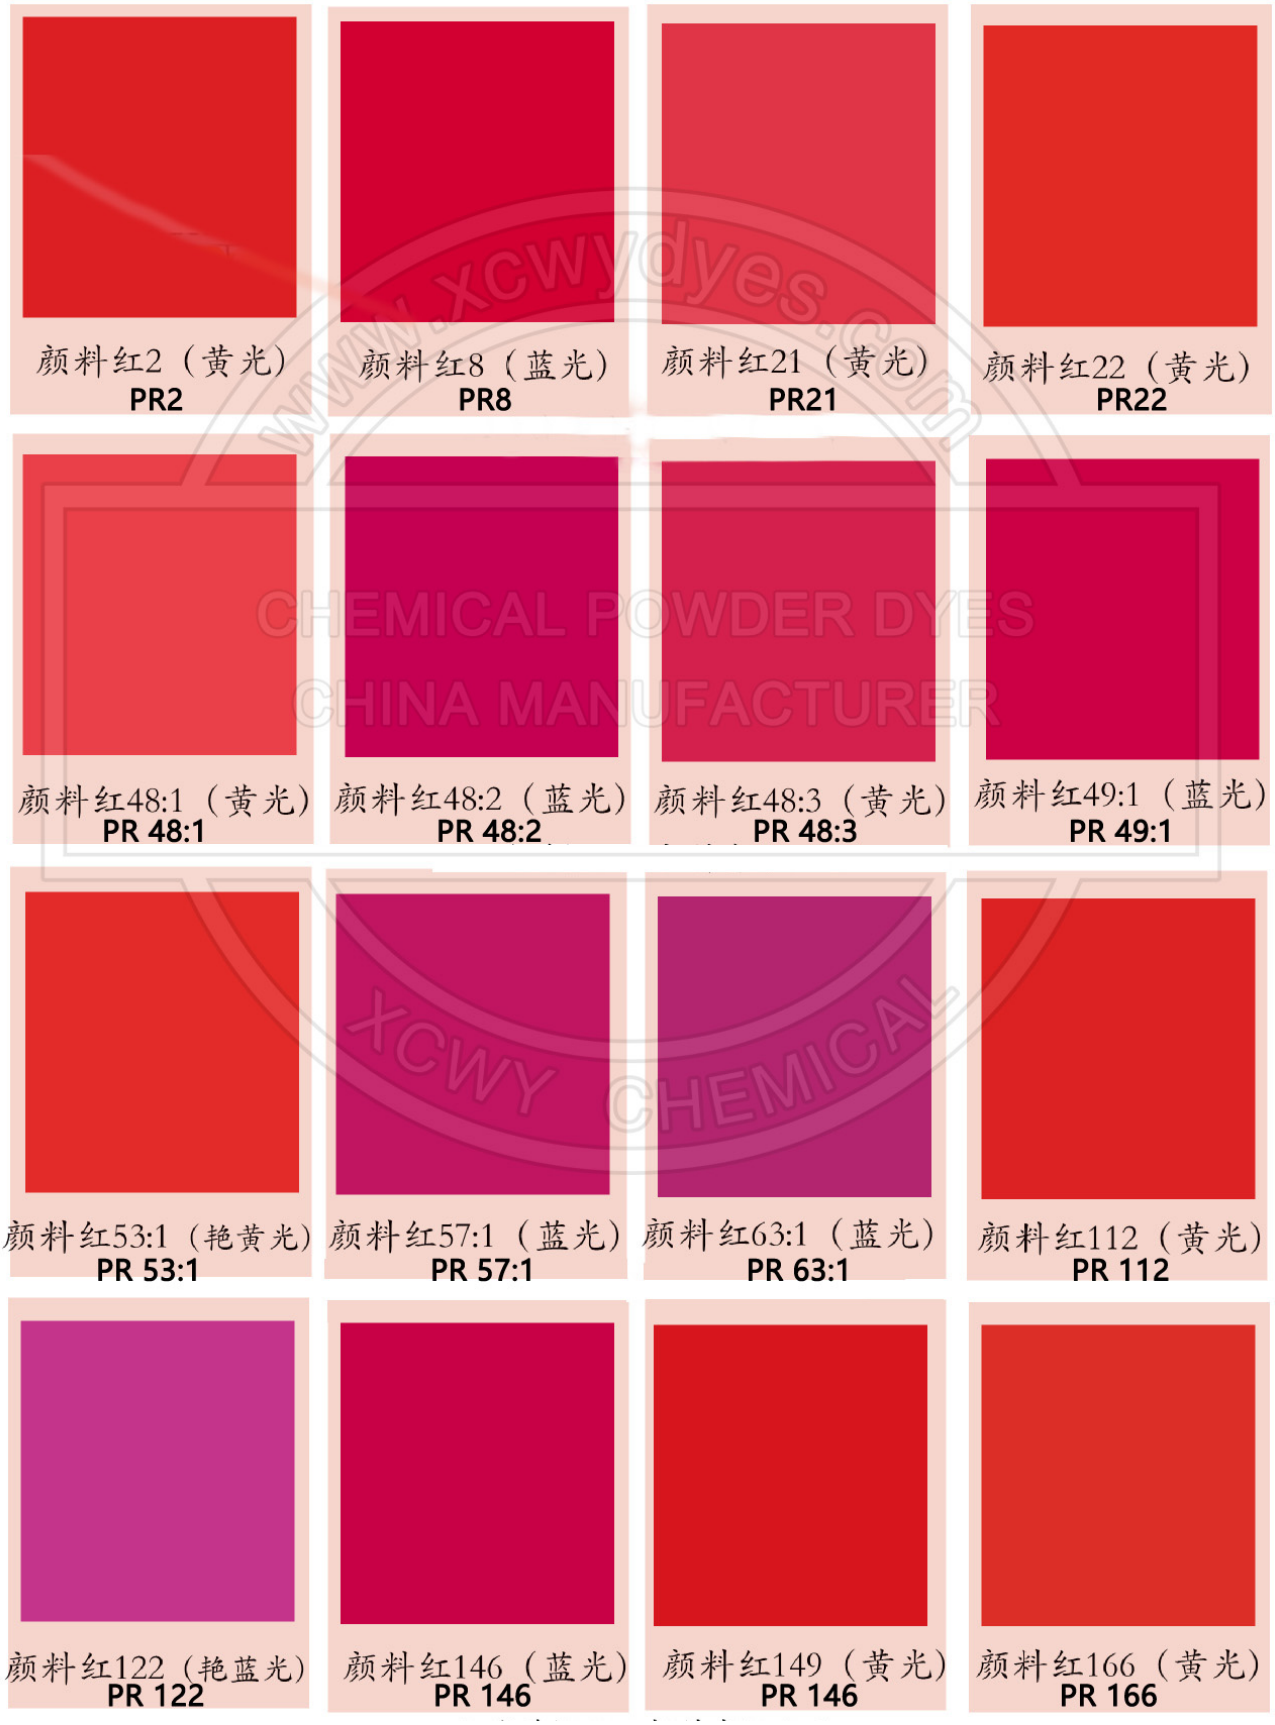

Acid resistance: Level 5

Alkali resistance: Level 5

Pigment Red **170 Application field**
Usage: Paint, plastic, ink.
Mainly used in coatings, it can match with molybdenum chromium red and quinacridone, and is recommended for printing ink. It has high coloring power, light fastness of grade 6, acid and alkali resistance, soap resistance, and heat stability of 200 ?/10min. It is used for metal decorative printing ink, and can also be used for pigment printing and raw material coloring of plastics, as well as wood and viscose fiber coloring.

Our Pigment Red List

CANGZHOU XINCHENG WEIYE CHEMICAL CO., LTD
