Solvent Red 132

Our solvent red 132 CAS 61725-85-7 is a kind of red powder solvent dyes which has good miscibility and solubility in various organic solvents, chemical synthesis, and natural resins, and has more outstanding solubility, thermal stability, light resistance, and strong coloring performance than current solvent dyes.

Solvent red dyes are widely used and closely related to people's lives. It is mainly used for paint, plastic, masterbatch, lubrication oil, shoe polish. They can also be used in high-tech fields such as laser technology, solar collectors, chemical and biochemical analysis, metal scratches and so on.

Solvent Red 132 Specification

» English name: Solvent Red 132, solvent red 2BC

» CAS number: 61725-85-7

» EC: 275-640-9/612-357-5

» Other product name: Oil soluble red BL; Oil soluble red 808

» Chemical structure: Azo metal complex

» Product appearance: red powder

Solvent Red 132 Basic Information

Basic Information	
Product Name	Solvent Red 132
Colour Index	Solvent Red 132
CAS No.	61725-85-7
Specification	
Shade	Similar With Standard
Density(g/cm3)	1.20
Appearance	Red Powder
