Pigment White 6 Paste

Cangzhou Xincheng Weiye Pigment white 6 paste also called Titanium Dioxide Paste is an opaque white liquid water-based pigment paste preparation, mainly composed of 70% ruitai type titanium dioxide pigment (titanium dioxide). It is very suitable for the application of decorative paper and is a high-quality and low-cost decorative paper color paste. In order to obtain an excellent formula for color paste preparation, this product combines high-performance additives and other raw materials with appropriate compounds, To achieve high efficiency in coloring applications, even using a small amount of our titanium dioxide pigment paste can generate significant cost advantages, providing high-quality cost saving solutions.

Pigment White 6 Paste Application

Pigment White 6 paste is the strongest coloring agent among white pigments, with excellent covering power and color fastness, suitable for opaque white products. Rutile shaped plastic products are particularly suitable for outdoor use and can provide good light stability to the products. Ruiti type is mainly used for indoor products, but with a slight blue light, high whiteness, strong covering power, strong coloring power, and good dispersibility. Pigment white 6 paste is widely used as a pigment in paints, paper, rubber, plastics, enamel, glass, cosmetics, inks, watercolors, and oil paints. It can also be used in the manufacturing of metallurgy, radio, ceramics and welding electrodes.

White 6 Pigment Paste Specification

Product name: Pigment White 6 Paste

Pigment solid: 50%

C.I. No.: 77891

Color Index: Pigment White 6

CAS NO.: 13463-67-7

EINECS NO.: 236-675-5

PH Value: 6-8

Heat resistance: 200?

Light fastness: 8

Our Pigment Paste List

Product Name	Full Shade	Tinting Color	C.I.No	Pigment Content%	Solid Content%	PH Value	Viscosity S(T4)	Acid Resistance	Alkali Resistance	Light Resistance
Yellow CA212			P.Y.12	40	45–50	7–9	15–60	5	5	4
Yellow CA214			P.Y.14	40	45–50	7–9	15–60	4	5	6
Yellow CA283			P.Y.83	40	46–50	7–9	15–60	5	5	6
