Pigment Yellow 14 Paste

Pigment Yellow 14 paste CAS 5468-75-7 is a yellow liquid with bright color, strong coloring power, good transparency and good application performance. Pigment yellow 14 paste is one of the important varieties of biphenylamine organic pigments. It has a slightly green light compared to pigment yellow 12, and leans towards green light compared to European color standards; It has good solvent resistance and paraffin resistance, especially in the United States where it is widely used for packaging and printing ink.

Pigment Yellow 14 Paste Application

Pigment Yellow 14 paste is mainly used for coloring rubber, plastics and rubber products, as well as for coloring polyurethane synthetic leather, high-end inks and coatings, and printing pastes.

APPLICATION DEMONSTRATION

PAPER

CONCRETE PAVING

RUBBER AND PLASTICS

ASPHALT

COSMETICS, FOOD AND DRUGS

CEMENT BUILDING MATERIALS

Yellow 14 Pigment Paste **Specification**

Product name: Pigment Yellow 14 Paste

Pigment solid: 40%

C.I. No.: 21095

Color Index: Pigment Yellow 14

CAS NO.: 5468-75-7

EINECS NO.: 226-789-3

PH Value: 6-8

Heat resistance: 180 ?

Light fastness: 5

Our Pigment Paste List

Product Name	Full Shade	Tinting Color	C.I.No	Pigment Content%	Solid Content%	PH Value	Viscosity S(T4)	Acid Resistance	Alkali Resistance	Light Resistance
Yellow CA212			P.Y.12	40	45–50	7–9	15–60	5	5	4
Yellow CA214			P.Y.14	40	45–50	7–9	15–60	4	5	6
