Pigment Blue 15:3 Paste

Cangzhou Xincheng Weiye Chemical Pigment Blue 15:3 Paste is a water-based latex color paste carefully developed using high-quality pigments and additives. It is an environmentally friendly water-based color paste with high coloring power, low viscosity, and good fluidity. This product has good compatibility with various natural, synthetic latex and synthetic resin materials. Widely used in the production of latex balloons, gloves, swimming caps, and other fields.

Pigment Blue 15:3 Paste Product parameters:

Pigment Index Number: Pigment Blue 15:3

Pigment content (%): 35

Light resistance TT/ST (grade): 8

Alkali resistance (grade): 5

Acid resistance (grade): 5

Heat resistance (?): 180

Pigment Blue 15:3 Paste Description:

* The light resistance and chemical resistance parameters are derived from the structural properties of pigments;

* The light resistance of level 8 is the best, and level 1 is the worst;

* All data is provided by the pigment supplier and it is recommended to conduct separate testing.

Pigment Blue 15:3 Paste Features:

1. Good compatibility, compatible with various types of latex and synthetic resins, with good gloss and bright colors;
2. Strong coloring power, high pigment content, and small particle size;
3. Good environmental friendliness, low VOC, no APEO.

Notes:

Mix thoroughly before use.

After use, the lid must be tightly closed and sealed to avoid surface contamination of the color paste or surface peeling due to moisture evaporation, which may affect the use. Store in a cool and ventilated environment at 0-35 ?.

Our Pigment Paste List

Product Name	Full Shade	Tinting Color	C.I.No	Pigment Content%	Solid Content%	PH Value	Viscosity S(T4)	Acid Resistance	Alkali Resistance	Light Resistance
Yellow CA212			P.Y.12	40	45–50	7–9	15–60	5	5	4
Yellow CA214			P.Y.14	40	45–50	7–9	15–60	4	5	6
